Problem: 8. Design a webpage using css which includes the following.

A. Use different fonts, styles- in the style definition define how each selector should work(font, colour etc.) then in the body refer to these selectors to activate the styles

B. Set a background image for both the page and single elements on the page.

```
<!DOCTYPE html>
<html>
<head>
<title>Practical 8</title>
<style>
/* Fixed static image for the page (id 1015 never changes) */
body {
background-image: url('https://picsum.photos/id/1015/800/600');
font-family: Arial;
}
h1 {
font-family: 'Times New Roman';
color: blue;
font-style: italic;
}
/* Fixed static image for the element (id 1025 never changes) */
div {
background-image: url('https://picsum.photos/id/1025/400/200');
color: white;
font-family: Courier;
width: 250px;
height: 100px;
```

```
}
</style>
</head>
<body>
<h1>KIET CSIT</h1>
<div>
Box with fixed background image.
</div>
</body>
</html>
```

KIET CSIT
